

Maintenance Manager

Release Notes v4.6.0.0 Fix 8

Introduction

This document defines the changes made to the Maintenance Manager product for fix release v4.6.0.0 Fix 8 and is specifically targeted at end users.

After reading through this document, should you have any further training or consultancy requirements then please contact your **exor** account manager.

Fix Details

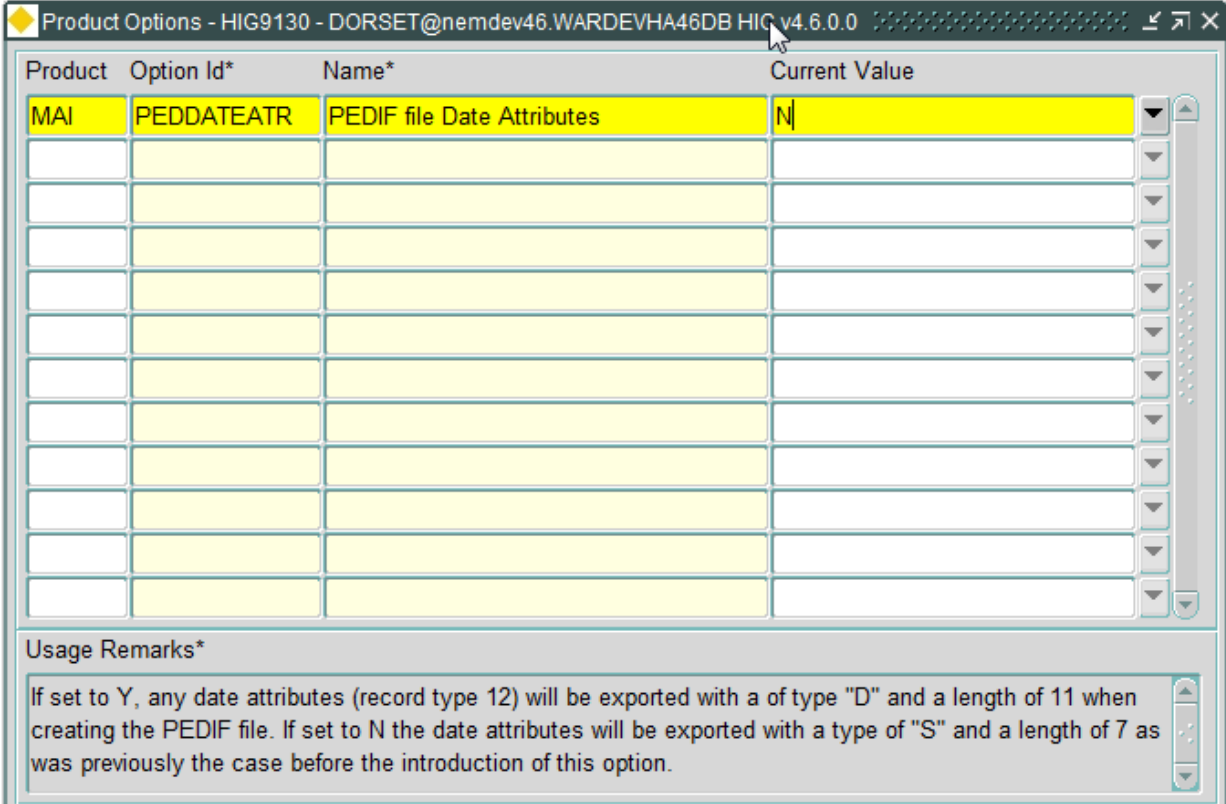

Baseline Release	4.6.0.0
Fix Description	New Product Option that determines how Date attributes are exported in the PEDIF file.
Prerequisites	Please apply MAI 4600 Fixes 1, 4, 6 and 7 before applying this fix.
Implementation Instructions	<p>Unzip mai_4600_fix8.zip to a staging folder.</p> <p>Log onto SQL*PLUS as the Highways Owner with the staging folder as the working directory.</p> <p>At the prompt type "START mai_4600_fix8.sql" and press return.</p> <p>Exit SQL*PLUS.</p>
Limitations	
Configuration Information	None
How To Test	Recommend full regression test
Rollback Strategy	Initially implement on a test environment

List of Amended Files

Filename	Version
pedif.pkw	3.7

New Product Option PEDDATEATR

New Y/N Product Option "PEDDATEATR" used to determine how asset type date attributes are exported in the PEDIF file.

The screenshot shows a software window titled "Product Options - HIG9130 - DORSET@nemdev46.WARDEVHA46DB HIG v4.6.0.0". It contains a table with four columns: "Product", "Option Id*", "Name*", and "Current Value". The first row is highlighted in yellow and contains the values "MAI", "PEDDATEATR", "PEDIF file Date Attributes", and "N". Below the table is a "Usage Remarks*" section with a text box containing the following text: "If set to Y, any date attributes (record type 12) will be exported with a of type 'D' and a length of 11 when creating the PEDIF file. If set to N the date attributes will be exported with a type of 'S' and a length of 7 as was previously the case before the introduction of this option."

Product	Option Id*	Name*	Current Value
MAI	PEDDATEATR	PEDIF file Date Attributes	N

Usage Remarks*

If set to Y, any date attributes (record type 12) will be exported with a of type "D" and a length of 11 when creating the PEDIF file. If set to N the date attributes will be exported with a type of "S" and a length of 7 as was previously the case before the introduction of this option.

This product option has two values:-

N = Date Attributes are exported as a type "12" record with "S" as the datatype and a length of 7 as was previously the case. **This is the Default value.**

Y = Date Attributes are exported as a type "12" record with "D" as the datatype and a length of 11.

Log No. Summary

This chapter summarises all software changes that have been made in this release.

These changes are derived from the following sources,

- Issues raised by Customers via Exor Support
- Issues raised internally by Exor

Issues

Internal Task ID	Issue	Support Log(s)
D-116399	Fixed an issue that was leading to duplicated type "5" records and duplicate attribute data on type "6" records when multiple PEDIF files are generated within a single session.	
D-115691	<p>New Y/N Product Option "PEDDATEATR" used to determine how asset type date attributes are exported in the PEDIF file.</p> <p>If the product option is set to "Y" then any type "12" record for date attribute will contain "D" for the datatype and have a length of 11 otherwise the datatype will be "S" and the length will be 7 as has previously been the case.</p> <p>The default value for the new product option is "N".</p>	8001501691
