4. Description of the Changes

4.1 Item Code Breakdowns form (mai1940)

This form has been modified to allow all users, who have been granted access, to define details for any Agency to which they have access. Product option ICBFGAC will influence the details that can be defined as follows:

ICBFGAC = 'N' Setting the option to 'N' will ensure details are unique at system level. This will prevent the duplication of Item Code Breakdown details across all Agencies.

Note: It is advised that only top level Admin Unit users should be granted access to the form if the product option is set to 'N'

ICBFGAC = 'Y' Setting the option to 'Y' will ensure details are unique at agency level. This will allow for Item Code Breakdown details to be defined for each Agency.
Note: An Agency code must be linked to the Admin Units that are to define their individual Item Code Breakdowns using Admin Units form (hig1860).

5. Log No. Summary

This chapter summarises all software issues that have been addressed by this fix.

For issues raised by customers, Bentley Technical Support Group (TSG) Ticket Numbers are cross referenced where applicable.

| Details | Internal Reference | TSG Ticket Number |
|--|--------------------|-------------------|
| When attempting to cancel a work order in Cancel Works Order form (mai3610) an error is produced when attempting to save, preventing the cancellation. The form has been modified to resolve the problem. | D-119368 | 8001532843 |
| After querying back details in Work Order Automation form (mai3818), error 'ORA-04062 signature of package ... ' is encountered when scrolling through the details. The form has been modified to overcome this. | D-119840 | 8001565001 |
| Item Code Breakdowns form (mai1940) only allows ICBs to be added if the user is the top level System Admin user. The form has been modified to allow users to define details for any Agency to which they have access. | D-119843 | 8001551192 |
