log_mai_4210_fix6.sql	3.0
mai_4210_fix6.sql	3.0
mai_inspection_api.pkw	3.12.1.0

Log No. Summary

This chapter summarises all software changes that have been made in this release.

These changes are derived from the following sources,

- Issues raised by Customers via Exor Support
- Issues raised internally by Exor

Issues

Internal Task ID	Issue	Support Log(s)
0110904	Inspection Loader - The time element has been removed from the processing that checks the Inspection Date from the file against previously loaded Inspections. This has been done so that the loader does not raise the error message "Error: Inspection Date less than previously loaded inspection. : Correct the inspection date." when Inspections with the same Activities, carried out on the same Section on the same day are loaded out of sequence.	8001018983 8001029848 8001031292 8001032054 8001036917
